Portfolio: [https://ferdyboy81.github.io/ftan\\_portfolio/](https://ferdyboy81.github.io/ftan_portfolio/)

I'm a web developer that utilizes creative problem solving and clean aesthetics to optimize user experience. I come from a background in information technology and visual arts, which influences my ability to quickly pick up technical concepts while also incorporating a keen sense of design.

## SKILLS

---

- **HTML5, CSS3, Javascript, Bootstrap, JQuery, PostgreSQL, MongoDB, Express, AngularJS, Node.js, .NET, API's, Github, WordPress, Adobe Photoshop.**

## PROJECTS

---

- **LegacyGames** is a website I created for a gaming company. I built this website from scratch using HTML5, CSS3, Javascript, Bootstrap and PHP.
- **NADOPET** is a collaborative effort to create a website database that Humane Societies could use to post their contact information and their adoptable pets. I helped build this project using: HTML5 | CSS3 | Javascript | MongoDB | Express | Angular | Nodejs | API's | Ajax | Github.
- **Flicker** is a game app that I created using HTML, CSS and Javascript. This was a very challenging project and a great learning experience since this was the first time I learned how to code in javascript.

## EXPERIENCE

---

### **Freelance Web Development 2016 - Present** **Web Developer**

- Various Front-End Projects ranging from creating landing pages, setting up graphic designs and other miscellaneous technology as needed.

### **Atkinson Baker-Court Reporters 2007-Present** **Litigation Support Specialist**

- Provides litigation technology support to the legal team, including database management, data manipulation and conversion.
- Communicate, correspond and interact with clients and outside entities, such as government agencies, vendors, corporations, and other law firms to gather information or data.
- Consult with Specialist and case teams to identify case, courtroom and mobile technology needs, including audio-visual equipment and presentation software options.

### **South Sea Surety & Insurance Inc. 2004-2005** **I.T. Administrative Assistant**

- Prepared and maintain computer installation upgrades and assisted CIO or MIS Manager in projects.
- Provided technical support on-site or via phone, email or help desk
- Perform security log file audits.
- Help maintain and debug website.
